

Acknowledgments

We thank a number of people for their contributions to this project. Alvin Braswell, Jeffrey Bean, John Gerwin, and John Cooper of the North Carolina Museum of Natural History provided digitized animal records used in the landscape analysis, as well as information on habitat affinities and conservation status for particular species groups. Stephen D. Busack also of the Museum, supervised the contract and provided technical editing for the report. Alexa McKerrow and Steve Williams of the NC GAP Analysis Project provided the land cover map. Alexa also reviewed drafts of the manuscript, as did Harry LeGrand and Jame Amoroso of the Natural Heritage Program. Richard LeBlond, of the Natural Heritage Program, and Gil Grant provided information on animal species observed during the ongoing Natural Heritage Inventory of Pender County. John Fussell provided information on birds found within the study area; Perry Sumner (NC Wildlife Resources Commission) provided information on carnivores; and J. Bolling Sullivan, Dale F. Schweitzer (Nature Conservancy), E. Quinter (American Museum of Natural History) provided information on lepidoptera. John Amoroso (NC Division of Parks and Recreation) helped with the GIS analysis.
